

Faithful

BRAND

Tetraploid Perennial Ryegrass

Faithful Brand Tetraploid Perennial Ryegrass is a early maturing tetraploid perennial ryegrass that is quick to establish. Faithful has an excellent feed value. The long tender leaves are sweet and are preferred over many other species of grasses. Faithful can be expected to produce high yields and excellent forage for the livestock producer.

Applications:

Faithful excels as a grass used in grazing, silage, hay, or greenchop, or used in combination with other forages including clovers (like Seminole Ladino Clover) and other forage grasses to produce excellent pasture.

Seeding Rate:

Plant Faithful at 25 to 30 pounds per acre, when planting alone or at 30% to 50 % of blends. Plant 1/4 to 1/2 inches deep. Broadcasting, add 50% more.
